

Grad Market

CCS not only provides a large array of products for commencement and graduation ceremonies, but we provide more knowledge about these events than anyone in the industry.

We offer extremely specialized tools to execute these events profitably, including: the ability to ID graduates and link them via email and text directly to their images, advanced green screen and auto-cropping services to offer grads more images, facial recognition to ID more images faster and more accurately, multi-image packages, the ability to easily customize grad and senior announcements and much more!

School administrators and families will love what you can offer using CORE Office and CORE Retail. Plus, **the ship-to-home service, which is critical in this market, will help you make more money!**

Tassel Frame
