

Extractions & Cut Outs

Get cut outs without green screen in MINUTES!

Our Total Knock Out service is the perfect chroma key alternative. This service will cut out your images from a traditional background. With TKO there is a no worry about green spill, reflections (from sequins or instruments) or problems with teams wearing green & blue uniforms. This service also works wonders on full-length images and curly, frizzy and blonde hair! Plus, this service is FAST. Get cutouts within minutes so you can use your images to make sales onsite or send instant links to personal galleries for ecommerce. Use these cut outs in CCS' Virtual Groups™, Premier products and more! See shooting guide for details.

Service	Price
TKO Cutout	\$0.21
Background Render (addition)	\$0.10
Image Resize Service	\$0.10/image

Certification by support required.

Chroma Key

Candid Color Systems® offers extraction services for images taken on chroma key blue and green backgrounds. When using our suggested settings, images are removed from the backgrounds for \$0.21 and new backgrounds can be added for \$0.10. Both the original image (now with a transparent background) and “rendered” image (with a background added) can be shown to consumers using our CORE ecommerce tool.

Using our ecommerce platform, consumers can select their own background and the finished product (with the background added) is dynamically displayed. Photographers can offer their consumers **100s of backgrounds** from our extensive library or upload custom backgrounds of their choice.

Extractions using the correct settings are typically available in your CORE account within minutes for online sales or image & order management. Service times could be longer in peak season (mid-May).

Service	Price
